🤖 PERSONAL PROJECTS

- **University API - github.com/pejko89/universityAPI**
  RESTfull server API with operations for CRUD for students and faculties, enrolling/withdrawing students at/from faculties and filtering data from db. It's written in Java, implementing MySQL, Spring Boot, Spring Data JPA, Spring Web, Hibernate, RESTful web services…

- **University client - github.com/pejko89/univeristyClient**
  Client website which consumes university API(above) by sending REST requests. It's written in JavaScript, HTML, CSS, implementing bootstrap.

- **Invoice API - github.com/pejko89/InvoiceApp**
  Similar to University API, but with a slightly more complex database, and less operations. Java, MySQL, Spring Boot, Spring Data JPA, Spring Web, Hibernate, RESTful web services…

- **ToDo list - github.com/pejko89/ToDo-list**
  JavaScript website for adding and removing tasks
- **Calculator**
  Java GUI simple calculator app

❧ EXTRA-CURRICULAR ACTIVITIES

- Played football for several local clubs for 18 years
  (was captain for many years)
- Recreational hiking
- Cross-country cycling
